Our Mission

We oversee every aspect of production from planting, harvesting, extracting and bottling. By controlling every aspect from seed to shelf, we give you the assurance that every product we make is from our USDA Certified Organic hemp, cultivated and processed 100% by us in Colorado.

ABOUT US

One Farm is a single sourced company offering a full line of USDA Organic CBD products. One Farm operates 100 acres of organic farmland in Boulder County where all of the grow operations take place.

WHY CHOOSE US?

OUR PROCESS

From seed chemistry and strain management to planting and harvesting, everything happens through us. Extraction, manufacturing and bottling are all handled by One Farm.

OUR MISSION

One Farm is committed to producing only the purest, high-quality CBD products that deliver optimal results for consumers.

OUR STANDARD

*One Farm controls every aspect of production, from seed, to soil, to shelf, to self. Our CBD products are made from the best **USDA Certified Organic** hemp available.*

OUR COMPETITOR

Average CBD products provide little to no information about where and how the hemp is grown, or how it is processed and extracted. We formed One Farm to address this massive void of information in the industry.

CBD EDU

01

WHAT IS CBD OIL?

CBD Oil is a dietary supplement and an excellent source of nutrients that can be safely consumed as part of a daily diet. Unlike cannabis oil (referring to high THC oil), CBD is legal, rich in natural cannabinoids, and does not cause the side effect of “getting high.”

03

WHAT IS THE ENDOCANNABINOID SYSTEM?

The ECS’s main role is to maintain bodily homeostasis – biological harmony in response to environmental changes such as physical and mental stress. Your body naturally produces its own endocannabinoids to support this system, but just like with any other nutrient, we can have a deficiency and may need extra support. This is where cannabis (specifically CBD) comes in.

02

HOW DOES CBD OIL WORK?

CBD interacts with receptors throughout your body’s Endocannabinoid system. This allows it to effectively treat many conditions, and help maintain health and wellness in the body!

04

WHERE IS YOUR HEMP GROWN? DOES IT MATTER?

Our hemp is grown in Colorado on our own family farm using pesticide free tactics and soil free of any toxins. Several companies purchase Overseas hemp, grown in ground poisoned with heavy metals. The hemp detoxifies the soil by absorbing its toxins and is then sold to US companies. We ALWAYS use USDA Certified Organic hemp and third-party test the final product before selling to consumers.

CBD EDU

05

WHAT TYPE OF EXTRACTION DOES ONE FARM USE?

We Extract our own CBD using Supercritical CO₂ extraction. We NEVER purchase oil from other producers because we can't guarantee quality. USP Grade Liquid CO₂ is heated with increased pressure, giving it the properties of a liquid and a gas, helping it go through the hemp and extract the product from it. This is the ONLY solvent free method of extraction.

06

WHAT STRENGTH SHOULD I TAKE?

There are a wide variety of factors that can influence which strength will work best. We suggest that you start with the 600mg (20mg/mL) bottle and use our graduated dropper to determine what strength you feel most benefits you. This product is our mid-strength, making it easy to adjust accordingly.

07

IS THERE THC IN YOUR PRODUCT?

Our products are full spectrum (meaning we extract from the entire plant), they will contain small amounts of THC in them that is always below 0.3%. We recommend that you refrain from using any CBD related product if you are subject to drug testing. Unfortunately, current testing will likely show ANY element of the Cannabis plant, even CBD.

PERKS

PERKS

PERKS

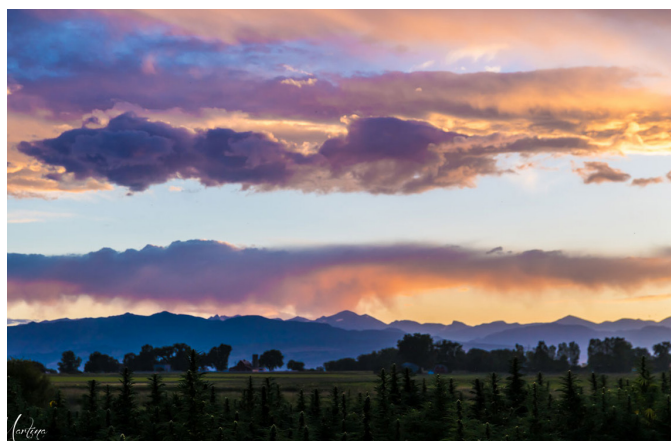

We want our influencers to get all the perks of promoting the finest USDA Organic CBD on the market! That's why we supply 100% of your personal CBD as well as products for GIVEAWAYS to run on your platform!

Our Affiliates receive 20% of all the sales they generate! To make that qualifiable we've provide a bit of historical data based on our platforms.

Of those reached through Instagram 2% are converted to OneFarm.com. Visitor spending on average \$110.

- 100% ORGANIC

One Farm Organics USDA Organic CBD oil by WAAYB for Pets. Available in 3.3mg, 10mg, 20mg, and 30mg strengths for your cat or dog.

ONE FAMILY FARM

One Family Farm

Our family is committed to offering only full spectrum, high CBD content products that improve people's lives. Our bright sunshine, warm summer days, cool summer nights, perfect soil and natural water runoff from the mountains provides the best environment for growing our high CBD USDA Organic Hemp.

Our 120 acres are located within Boulder County, Colorado, an area known as the “Napa Valley of Hemp” due to its perfect conditions for farming. Through soil tests conducted by Colorado State University and the utilization of subsurface irrigation to reduce water usage, we are constantly working hard to ensure our land remains the ideal place to cultivate hemp.
