Sustainably

remedies to  
enrich the lives of  
those around us.

# Our Story

We combine high quality natural ingredients with our USDA Organic CBD to give your body the best that nature has to offer. We control everything from seed to self in order to provide all-natural products you and your clients can trust.

---

WAAYB was founded in January 2017 with the goal of creating the highest quality CBD products on the market. When we began we quickly realized that the CBD space offered very little information about how hemp was being grown and processed. This made it difficult

to decipher if you were getting quality product or something with traces of pesticides, heavy metals and solvents. We decided our products would be created with the best hemp, grown organically in the perfect climate, extracted without toxic solvents, and mixed with quality ingredients. The only way to accomplish this was to oversee every aspect of production from planting, harvesting, extracting and bottling. By controlling everything from seed to shelf, we give you the assurance that everything we make is from our USDA Certified Organic hemp, lovingly raised, cultivated and processed 100% by us in Colorado.

# HEMP

**Hemp extract** is created by processing hemp plants to concentrate the cannabinoids and terpenes found in the leaves and flowers.

**CBD** is one of the most prevalent cannabinoids found in hemp and has been used to **calm** nerves, **focus** attention, **recover** from inflammation and **support** healthy sleep cycles.

Scientists found that the benefits of CBD are more pronounced when it can work together with the other cannabinoids found in hemp, a phenomena called the **entourage effect**. For this reason, all our products are made with **full-spectrum hemp extract**.

**USDA ORGANIC CBD**  
**Formulated to bring**  
**you nature's best.**

100% of our hemp is hand harvested to reduce the amount of material wasted, prevent diesel and exhaust from contaminating the product, and reduce our carbon footprint.

We use super critical CO<sub>2</sub> extraction method. This allows us to extract the beneficial cannabinoids without the use of harsh solvents.

"My husband has suffered from neuropathy pain in his feet for years. He has taken different medicines that would take the edge off but not enough to keep his feet from hurting or enough to let him sleep all night. Since he has been using the hemp oil, it is amazing, his feet aren't hurting and he has slept every night since starting this wonderful product. I cannot thank WAAYB enough. "
